Bridge reinforcing cage being lowered into the casting mould

### Precast Bridge Reinforcing Cage

StelCrete offers pre-assembled reinforcing cages for precast box culverts and bridges. Cages come ready to place in the concrete form and pour. The cages are accurately produced, securely welded and meet all industry standards. Units can be supplied with pre-welded stainless steel positioning bars. This eliminates the need to place plastic or concrete chair spacers. Just place the cage and pour the concrete. Custom reinforcing cages for wing walls and footings are also available.

Precast Bridge Footings; ready to ship to the site

Precast Wing Wall: L shaped units ready for secondary pour of wall sections

Pre-assembled footing reinforcing cage; complete with cross supports for the post-tensioning ductwork

Installed precast bridge and wing wall units. Exposed rebar dowels were supplied pre-welded as part of the reinforcing cage assembly
